

RADON TESTING

This is a 48 Hour continuous test for Radon in the home.

Protocols:

- In order for us to place the unit we need all windows and doors shut except for normal exit and entry.
- The A/C set on a normal setting (between 74-78 degrees) 12 hours prior to us coming out and throughout the duration of the test.
- Closed home conditions 12 hours prior to the test and throughout the duration of the testing.

**** Radon Note:**

Once we place the Radon testing unit in the home, it is not to be touched or moved as the machine has a built in alarm.

If the unit is touched or moved the test will be null and void. The voided test charge is \$175.00
